

Senior PHP/Laravel Web Developer (NY Metro Area or Remote)

Position Overview

LifeWorx is a fast-growing home healthcare company looking for a Senior PHP Web Developer to improve existing proprietary software and build new applications to power our growth. You'll be working alongside our VP of Technology on high-impact projects, and have the opportunity to see the entire software development process from start to finish. We are primarily looking for full-time developers, but may be open to part-time work as well. Candidates who can work in person or with a hybrid arrangement in the NY metro area will be given preference, but we are open to fully remote work as well.

Responsibilities

- Develop and optimize proprietary matching system to identify the best candidates for a client & job based on hundreds of factors
- Analyze complex SQL structures/queries to identify pain points and optimize to improve performance
- Work with UI/UX Designer to streamline software workflow and meet business objectives
- Power through ambiguity, make intelligent decisions, and collaborate with an agile team to achieve biweekly sprint goals
- Assist with development of a modern container-based CI/CD pipeline
- Ensure adherence to cybersecurity best practices

Skills & Qualifications

- Bachelor's degree in Computer Science or related field, and 2+ years of professional experience working as a web developer
- Expert at object-oriented and procedural PHP as well as the Laravel framework
- Highly skilled at writing optimized SQL queries and working with RDMS analysis tools
- Highly skilled with developing RESTful APIs and strong understanding of the HTTP protocol
- Strong understanding of web security best practices to prevent XSS attacks, SQL injections, etc.
- Some experience with front end languages and frameworks (JavaScript, jQuery, and Vue)
- Some experience writing custom HTML & CSS
- Experience working with Docker containers and Bash command lines skills are a plus

Soft skills

- Team player who can effectively communicate with our less tech-inclined staff.
- Self-sufficient, task-oriented problem solver.
- Someone who can stay organized and complete projects but also has the flexibility to change directions depending on immediate need.
